PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in full-stack development, embedded systems, networking, and technical support. Developed HR systems, document management platforms, and IoT-based research projects. Recognized through published research and award-winning technical innovations. Seeking an entry-level software, systems, or IT role where I can contribute technical and problem-solving skills.

TECHNICAL SKILLS

- Programming : Python, JavaScript, TypeScript, C++, HTML, CSS, SQL
- Frameworks & Tools: React, Bootstrap, ASP.NET Core, Git, VS Code, SSMS
- Database: SQL Server, PostgreSQL, Local Storage APIs. MongoDB
- Networking & Systems: Switch Configuration, FDAS, CCTV Systems, Tailscale, troubleshooting, technical support
- Embedded Systems: Arduino, RFID Systems, Sensors, IoT Integration. ESP Systems
- Workflow Experience: Document management, file organization, approval flows, version control support, UI/UX documentation

EXPERIENCE

Systems Development and Technical Support Intern | JREMD Technologies, Inc. | Mar 2026 - Apr 2026

- Developed responsive frontend enhancements for a Document and Quotation Management System using HTML, CSS, and JavaScript.
- Implemented file management and quotation-tracking features to improve internal workflow efficiency.
- Configured remote access and deployment environments using Tailscale.
- Managed switch configuration, internet troubleshooting, and technical equipment setup for office operations.
- Collaborated with developers and technical staff in both software and on-site support tasks.

Computer Engineer Intern | Centro Escolar University | March 3, 2026 – Mar 25, 2026

- Optimized laboratory operations and technical administrative support for BSIT-related activities.
- Prepared and updated laboratory manuals, documentation, and instructional materials.
- Organized digital learning resources and technical files for faculty and student use.
- Provided basic troubleshooting and technical support for laboratory systems and equipment.
- Supported academic technology initiatives and documentation workflows.

Volleyball Coach & Program Developer | Passion Sports Philippines | Apr 2023 – Present

- Designed structured volleyball training programs focused on athlete development and performance improvement.
- Demonstrates leadership, communication, and the ability to coach players toward consistent process adoption.

Legal Administrative Coordinator | Iguidez-Onida Law | Mar 2019 – Sep 2019

- Managed confidential legal documents and client information with close attention to organization and security.
- Coordinated schedules, client communications, and case-file organization using digital management practices.

SYSTEMS AND TECHNICAL PROJECTS

Document & Quotation Management System | Internship Project | 2026

Tech Stack: HTML, CSS, JavaScript, Node.js, Local Storage APIs, Tailscale deployment

- Designed and developed a full-stack Document and Quotation Management System for internal business operations.
- Built responsive frontend interfaces for quotation tracking, file organization, approval workflows, and document version management.
- Implemented file-management functionalities, workflow automation, and operational tracking features using JavaScript and Node.js.
- Configured deployment environments and remote system access using Tailscale.
- Performed end-to-end system testing, debugging, optimization, and deployment independently.

CEU HR Ecosystem | Full-Stack HR Management Platform | Ongoing

Tech Stack: C# ASP.NET Core (Web API), EF Core, HTML, CSS, JavaScript, Bootstrap, SQL Server Express

- Developing a full-stack HR platform with modules for applicant tracking, job posting management, authentication, payroll, leave management, and performance monitoring.
- Designed responsive user interfaces and integrated backend services for authentication, role management, and data handling.

Autonomous RFID-Equipped Robot for Inventory Management | Research / Award-Winning Project

Tech Stack: Arduino, RFID, Sensors, Web Application (HTML CSS, JavaScript), Database Management, AWS Deployment. ESP32

- Developed an autonomous RFID-based inventory solution with a full-stack web application for monitoring, control, and database management
- Designed automation workflows for inventory tracking, real-time monitoring, and data management.

Speed Typing Test Web Application | Personal Project | 2026 | <https://speedtypingtest.lovable.app/>

Tech Stack: React, TypeScript, CSS, PostgreSQL, lovable deployment

- Built a responsive React and TypeScript application that measures typing speed, accuracy, and real-time user performance.
- Implemented interactive typing lessons, randomized typing tests, and live statistics tracking including WPM and accuracy monitoring.

EDUCATION

Centro Escolar University | Bachelor of Science in Computer Engineering | August 2022 - 2026

Pamantasan ng Lungsod ng Maynila | Coursework in BS in Civil Engineering | June 2018 - 2020

AWARDS, PUBLICATIONS & CERTIFICATIONS

- First Place, Oral/Paper Competition — Development of an Autonomous RFID-Equipped Robot for Inventory Management (Sci-Tech Search for Best UR 2025).
- First Runner-Up, Research Paper Presentation — 17th Annual University Research Forum, Centro Escolar University (May 7, 2025).
- Published research in the International Journal of Science Architecture Technology and Environment (DOI: 10.63680/ijstate0226017.017).
- Published work on LMS page views and board-exam outcomes in the Global Journal of Arts, Humanities and Social Sciences
- Technical credentials include Fortinet cybersecurity certifications, EnGenius wireless/network certifications, and coursework in embedded machine learning, IoT boards, and FPGA systems
- Selected Participant, UNLEASH Philippines Innovation Lab Talent Program — Royal Academy of Engineering & UNLEASH Philippines (2025)
 - Represented regional talent in a nationwide innovation and collaboration program.
